

Ruttika Shrirao

Software Engineer

 ruttikashrirao@gmail.com |  +91-7447688846 |  [in/ruttikashrirao](https://in.linkedin.com/in/ruttikashrirao)

Software Engineer with 3+ years of experience building scalable, secure, and high-performance applications. Skilled in **Node.js, MongoDB, AWS, Redis, REST APIs, React.js, Next.js, and Background Processing**, with hands-on experience across **AI, SaaS, Health and E-commerce domains**. Proven ability to design robust backend systems, optimize application performance, implement scalable architectures, and deliver business-critical features that enhance user experience and operational efficiency.

SKILLS

Backend Technologies: Node.js, Express.js, JWT Authentication, Unit Testing

Frontend Technologies: React.js, Next.js, Redux, TypeScript

Messaging & Caching: BullMQ, SQS, Redis, Queue Processing

Payments & other Skills: Razorpay, Admin.js, Prompt Engineering

Databases: MongoDB, MySQL

AI & Automation: OpenAI (GPT-4), Gemini, Replicate APIs

Cloud & DevOps: AWS (EC2, S3), Docker, Git, Gitlab

EXPERIENCE

Digiflux Pvt Ltd, Software Engineer

01/2025 – Present | Vadodara GJ

- Built an AI-powered media platform for Amazon and other e-commerce platforms to automate marketing content generation using **GPT-4, Gemini, and Replicate APIs**, with scalable image-processing microservices for **AI generated images, Background Removal, Image Upscaling, and Image Cleanup**.
- Launched a Fashion Video Generation Module using LLMs, prompt engineering, and image-to-video models.
- Collaborated closely with **Indian and European clients** teams, ensuring efficient task delivery and effective communication that led to successful project execution.
- Integrated **AWS S3 and CDN** for scalable file storage and fast content delivery, optimizing the serving of static assets while improving application performance and reducing server load.
- **Optimized MongoDB queries** and backend APIs, improving overall application performance by 40% through handling data on application level.
- Built full-featured admin panels using AdminJS and React.js with role-based access control, real-time analytics dashboards.
- Integrated TanStack Query (React Query) for efficient server-state management, enabling optimistic UI updates, background data sync, and **elimination of redundant API calls**.
- Built **full-stack applications from scratch** using Express.js, Next.js, React, and TypeScript, transforming business requirements into scalable solutions.
- Collaborated with cross-functional teams on code reviews, Git merges, conflict resolution, synchronizing branches and **production deployments**.

The Generalist Company, Software Developer

06/2023 – 12/2024 | Pune MH

- Developed scalable React.js + Redux applications, building reusable component libraries.
- Visualized campaign performance data using interactive **graphs and tables**.
- Developed and maintained responsive, high-performance web applications using React.js, Redux, delivering consistent cross-browser and cross-device user experiences.
- Integrated **REST APIs** to fetch and display dynamic content, ensuring reliable and efficient data rendering across the platform.

EDUCATION

Master of Science in Computer Science
Sant Gadge Baba Amravati University, Amravati

2021 – 2023
